

INFERTILITY - MASTER COURSE – MINIMAL INVASIVE SURGERY

Preliminary Course Agenda

Tuesday 14th October 2025

**Auditorium
Ground
floor**

Generalities and causes of infertility

8.30 – 8.45 - Welcoming participants and explaining the course

Laparoscopy was an essential examination, then it began to replace surgery – where are we today? – *Pr J.L. Pouly*

Epidemiology: Low birth rate and demography

8.45- 9.15 - The main causes and their variability according to age and population and...

Do not confuse low birth rate and infertility: the importance of age and behavior... - *Pr J.L. Pouly*

Infertility imaging

Ultrasound

9.15 – 10.00 - What can ultrasound see and what can it not see in cases of infertility – *(ukrainiennes)*

10.00-10.30 - Coffee break

MRI and radiology

10.30 – 13.00 - What are the indications for radiological examinations and MRI in an infertility assessment? Can we still expect progress? *(team radio Clermont)*

13.00-14.00 – Lunch at CICE

**Room C
2nd floor**

14.00-16.00 - Practical training – Pelvi-trainer sutures

16.00-16.30 - Coffee break

**Room B
2nd floor**

Tubal infertility

Etiology of tubal infertility

The main causes and their variability according to age, population, and parity, which raises the question of its diagnosis - *Pr J.L. Pouly*

Diagnosis and exploration

The principles of HYFOSI and its major contribution to avoiding HSG and laparoscopy diagnosis... – *Dr Massin*

Surgical techniques

Neostomies, adhesiolysis, recanalization, salpingectomy – principles of microsurgery – *Dr C. Chauffour*

Surgical results and strategy

Results according to pathology and IVF indication and therefore strategy and patient information - *Dr C. Chauffour*

INFERTILITY - MASTER COURSE - MINIMAL INVASIVE SURGERY

Wednesday 15th October 2025

**Auditorium
Ground floor**

Endometriosis

8.30 – 9.30 - Etiology, pathophysiology, classification
Emphasize the unknowns of this pathology – *Pr M. CANIS*

Diagnosis

9.30 – 10. 00 - Difficulty of diagnosis
Role of salivary tests and imaging (quick review) – *CANIS OU POULY OU BENDIFALLAH*

10.00 – 10.30 - Coffee break

Treatment of endometriomas

10.30 – 11.00 - Surgical techniques by laparoscopy and alternative (abstention, alcohol consumption, etc.) – *Dr C. FIGUIER*

Treatments of deep endometriosis (

11.00 – 11.30 -Surgical techniques by laparoscopy and alternative (abstention, medical treatments) – *Pr JL. POULY ou M. CANIS*

Strategy for infertility

11.30 – 12.00 - Surgical results. When to operate, when to undergo AMP...
Pr JL. POULY ou M. CANIS

**Room C
2nd floor**

13.00 -14. 00 - Lunch

**Room B
2nd floor**

14.00 – 16.00 - Hands on training animal model
16.00-16.30 – Coffee break

Ovarian infertility

Ovarian drilling

16.30 – 17 .00 - Drilling techniques, results, and their role in OCP – *Dr A.S. GREMEAU*

Ovarian rejuvenation

17.00 – 17.30 - Can ovaries be rejuvenated, how, and what are the results?
are the results – *Dr GUERIN*

INFERTILITY - MASTER COURSE - MINIMAL INVASIVE SURGERY

Thursday 16th October 2025

**Auditorium
Ground
floor**

8.30 – 13.00 - Demonstration opératoire

**Room C
2nd floor**

13.00 -14.00 – Lunch at CICE

Uterine Pathology (excluding Adenomyosis)

**Auditorium
– Ground
floor**

Different Pathologies and Their Role in Infertility

14.00 – 14.30 - Catalog of Pathologies and Discussion of Their Involvement in Infertility, and Review of Diagnostic Methods – *Dr C. CHAUFFOUR*

Surgical Treatment of Fibroids

14.30-15.00 - Surgical Techniques by Laparoscopy and/or Laparotomy – Prevention of Adhesions - *Dr P. CHAUVET OU Pr R. BOTCHORISHVILI*

Other Treatment Techniques for Fibroids

15.00 – 15.30 - Non-Surgical Techniques: Have They Proven Effectiveness and When Should They Be Offered? – *Prs CAPMAS OU PHILIP*

Surgery for Other Pathologies

15.30 – 16. 00 - Surgical Techniques for Polyps, Synechiae, Malformations, and Isthmoceles - *Dr G. KUKINA*

16.00-16.30 Coffee break

Strategy for Uterine Pathologies

16.30 – 17.00 – When should surgery be performed? Should surgery be performed preventively?

Dr A.S. GREGMEAU OU Pr J.L. POULY

INFERTILITY - MASTER COURSE - MINIMAL INVASIVE SURGERY

Friday 17th October 2025

**Auditorium –
Ground floor**

8.30 – 13.00 - Demonstration opératoire

**Room C
2nd floor**

13.00 -14.00 – Lunch at CICE

**Auditorium –
Ground floor**

Adenomyosis

Epidemiology, Pathophysiology, and Diagnosis

14.00- 14.30 - Uncertain Pathology with Difficult Diagnosis – *Dr G. KUKINA*

Surgical or Medical Treatment, ART or Nothing

14.30-15.00 - Description of the Surgical Technique and Discussion of Indications with the Alternative of Medical Treatment + ART –

Dr A.S. GREMEAU OU Pr J.L. POULY

How to conduct an Infertility Assessment

15.00 – 15.30 - One Train Can Hide Another - *Dr A.S. GREMEAU*

The Role of Surgery and Treatment Results)

15.30-16.00 - Surgery Retains a Place – ART Doesn't Do Everything – the Two Are Complementary, But Defined Strategies Are Required

Pr J.L. POULY

16.00-16.15 Coffee break

Future of Infertility Treatments

16.15-16.45 - Can Biology Still Revolutionize Infertility Management –

Dr BRUGNON

16. 45 - **Closing Session**
